

Background:

For some schemes, for all authorisation requests related to chip transactions, acquirers must provide the integrated circuit card system related data, including the sub-elements: 0095, 9F10, 9F26, 9F27, 9F34, 9F36 and 9F37.

For the moment, they are only mandatory for debit transactions. Their conditions of presence must be corrected.

Implementation:

Change to Volume 3.2 – Face-to-face payment / Unattended payment

7 Message descriptions

A: Payment autho. req. (EMV chip and contactless EMV chip) : 0100
B: Payment autho. request (magn. stripe and contactless magn. stripe) : 0100
C: Resp. to payment autho. req. (contact and contactless) : 0110
