Identifier of the BDK key format

Background:

In field 48 type 0002, the identifier of the BDK key is set in bytes 2 to 15 and not 2 to 5.

Proposition :

Change in Volume 2 – Data field dictionary

2.3.3 Definition of data fields used

Field 48

Security data

…

TYPE = 0002: BDK (Base Derivation Key) name

…

The Identifier data element is formatted as follows:

Byte 1	Type of BDK key identifier (see values below)
Bytes 2 to 15	BDK key Identifier according to the type transported in byte 1 (paddé à droite)

…
